Cub Energy Announces 2020 Results

Houston, Texas – March 31, 2021 – Cub Energy Inc. (“**Cub**” or the “**Company**”) (TSX-V: **KUB**), a Ukraine-focused upstream oil and gas company, announced today its audited financial and operating results for the year ended December 31, 2020. All dollar amounts are expressed in United States Dollars unless otherwise noted. This update includes results from Kub-Gas LLC (“**Kub-Gas**”), which Cub has a 35% equity ownership interest, Tysagaz LLC (“**Tysagaz**”), Cub’s 100% owned subsidiary and CNG LLC (“**CNG**”), which Cub has a 50% equity ownership interest.

Patrick McGrath, Interim CEO of Cub said: “*We are pleased to report the two Jenbacher power units arrived on site on the RK field in Q4 2020 and were successfully installed and tested during Q1 2021 and just awaiting final regulatory approval to start selling into the local power grid. While the commercialization has taken longer than expected, we look forward to the commencement of power production. Due to stronger gas trading margins in the fourth quarter of 2020, the Company reported net income of \$165,000 during the three months ended December 31, 2020.*”

Operational Highlights

- Achieved average natural gas price of \$3.79/Mcf and condensate price of \$41.07/bbl during the year December 31, 2020 as compared to \$5.36/Mcf and \$49.51/bbl for 2019. The decrease in gas price is in large part due to the impact of COVID-19. To date in 2021, the Company has seen the price of natural gas in Ukraine rebound to the \$5/Mcf-\$6/Mcf range.
- Production averaged 619 boe/d (97% weighted to natural gas and the remaining to condensate) for the year December 31, 2020 as compared to 784 boe/d for 2019.
- In 2020, the Company has signed a contract for the purchase of two Jenbacher gas power generation engines that should convert the natural gas produced from the RK field into power that can be sold in western Ukraine at local market rates. The two units were manufactured and delivered to the RK Field in the fourth quarter of 2020 to begin installation and commissioning. Each power generation unit will have the capacity to produce as much as 1.5 megawatts (“MW”) of power or 3 MW in total.

Financial Highlights

- The gross profit on the Company’s gas trading business increased to \$1,523,000 during the year ended December 31, 2020 as compared to \$825,000 in gross profit in 2019.
- The Company reported net income of \$165,000 or \$0.00 per share during the three months ended December 31, 2020 as compared to a net loss of \$11,320,000 or \$0.04 per share during 2019. The Company reported a net loss of \$2,109,000 or \$0.01 per share during the year December 31, 2020 as compared to a net loss of \$11,060,000 or \$0.04 per share during 2019. Excluding the one-time impairment and provision charges in 2019, the Company would have had net income of \$262,000.
- Netbacks of \$8.55/boe or \$1.43/Mcfe were achieved for the year December 31, 2020 as compared to netback of \$15.88/Boe or \$2.65/Mcfe for 2019.
- The Company has implemented certain cost-cutting initiatives during 2020, including the layoff of eleven team members, salary and director fee reductions, the signing of office leases at lower rent levels and a general decrease in the use of external consultants.

(in thousands of US Dollars)	Three Months Ended December 31, 2020	Three Months Ended December 31, 2019	Year Ended December 31, 2020	Year Ended December 31, 2019
Petroleum and natural gas revenue	69	59	215	247
Pro-rata petroleum and natural gas revenue ⁽¹⁾	836	1,468	3,549	9,404
Revenue from gas trading	1,328	1,487	5,710	11,455
Net income (loss)	165	(11,320)	(2,109)	(11,060)
Income (loss) per share – basic and diluted	0.00	(0.04)	(0.01)	(0.04)
Funds generated from (used in) operations	197	(1,345)	182	(995)
Capital expenditures ⁽²⁾	1,423	77	1,423	86
Pro-rata capital expenditures ⁽²⁾	1,398	819	2,267	2,092
Pro-rata netback (\$/boe) ⁽³⁾	6.69	6.61	8.55	15.88
Pro-rata netback (\$/Mcf) ⁽³⁾	1.12	1.10	1.43	2.65

	December 31, 2020	December 31, 2019
Cash and cash equivalents	4,424	6,206

Notes:

- (1) Pro-rata petroleum and natural gas revenue is a non-IFRS measure that adds the Company's petroleum and natural gas revenue earned in the respective periods to the Company's 35% equity share of the KUB-Gas natural gas sales that the Company has an economic interest in.
- (2) Capital expenditures includes the purchase of property, plant and equipment and the purchase of exploration and evaluation assets. Pro-rata capital expenditures are a non-IFRS measure that adds the Company's capital expenditures in the respective periods to the Company's 35% equity share of the KUB-Gas and 50% equity share of CNG Holdings capital expenditures that the Company has an economic interest in.
- (3) For purposes of the pro-rata netback calculation, the Company's profit from gas trading is added to the revenue of Kub-Gas to better reflect the true natural gas price achieved and field netback.

Reader Advisory

With the current cash resources, negative working capital, uncertainty surrounding the successful installation of the Jenbacher power generation units, fluctuating commodity prices, currency fluctuations, reliance on a limited number of customers, the Company may not have sufficient cash to continue the exploration and development activities. These matters raise significant doubt about the ability of the Company to continue as a going concern and meet its obligations as they become due.

Oil and Gas Equivalents

A barrel of oil equivalent (“boe”) or units of natural gas equivalents (“Mcf”) is calculated using the conversion factor of 6 Mcf (thousand cubic feet) of natural gas being equivalent to one barrel of oil. A boe conversion ratio of 6 Mcf: 1 bbl (barrel) or a Mcfe conversion of 1bbl: 6 Mcf is, based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead and is not based on either energy content or current prices. While the boe ratio is useful for comparative measures, it does not accurately reflect individual product values and might be misleading, particularly if used in isolation. As well, given that the value ratio, based on the current price of crude oil to natural gas, is significantly different from the 6:1 energy equivalency ratio, using a 6:1 conversion ratio may be misleading as an indication of value. The disclosure in this press release is prepared in accordance with NI 51-101 standards.

Except for statements of historical fact, this news release contains certain “forward-looking information” within the meaning of applicable securities law. Forward-looking information is frequently characterized by words such as “plan”, “expect”, “project”, “intend”, “believe”, “anticipate”, “estimate” and other similar words, or statements that certain events or conditions “may” or “will” occur. Cub believes that the expectations reflected in the forward-looking information are reasonable; however there can be no assurance those expectations will prove to be correct. We cannot guarantee future results, performance or achievements. Consequently, there is no representation that the actual results achieved will be the same, in whole or in part, as those set out in the forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the statements are made, and are subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking information. Some of the risks and other factors that could cause the results to differ materially from those expressed in the forward-looking information include, but are not limited to: general economic conditions in Ukraine, the Black Sea Region and globally; political unrest and security concerns in Ukraine; industry conditions, including fluctuations in the prices of natural gas, power and foreign currency; governmental regulation of the natural gas industry, including environmental regulation; unanticipated operating events or performance which can reduce production or cause production to be shut in or delayed; failure to obtain industry partner and other fourth party consents and approvals, if and when required; competition for and/or inability to retain drilling rigs and other services; the availability of capital on acceptable terms; the need to obtain required approvals from regulatory authorities; stock market volatility; volatility in market prices for natural gas; liabilities inherent in natural gas operations; competition for, among other things, capital, acquisitions of reserves, undeveloped lands, skilled personnel and supplies; incorrect assessments of the value of acquisitions; geological, technical, drilling, processing and transportation problems; changes in tax laws and incentive programs relating to the natural gas industry; failure to realize the anticipated benefits of acquisitions and dispositions; and the other factors. Readers are cautioned that this list of risk factors should not be construed as exhaustive.

This cautionary statement expressly qualifies the forward-looking information contained in this news release. We undertake no duty to update any of the forward-looking information to conform such information to actual results or to changes in our expectations except as otherwise required by applicable securities legislation. Readers are cautioned not to place undue reliance on forward-looking information.

Neither the TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.
